

2026
2027

WIMED-A SUCCESSFUL HISTORY SINCE 1976.

Anniversaries are an opportunity for celebrating, getting together, but also stopping to think, look back on all your journey and, sometimes, find the real meaning of what you have achieved so far.

This is how **Wimed's 50th anniversary** will be and we welcome it in 2026 with all its enthusiasm and energy.

After all, in five decades, we have come a long way: the best homecare solutions are always present in our Wimed catalog, with particular attention to everything related to improving the quality of elderly and disabled people lives—both at home and in hospitals, nursing homes, and all places dedicated to the care and support of the patients.

We combine the undisputed **professional know-how**, the quality of the products and the wealth of humanity that all Wimed employees and the large Movi family bring to the table every day, with a vision projected into the future and the construction of new ways of interacting with stakeholders.

Among these, digitization plays a key role, as an enabler of the future and a driver of change. At Wimed, every process is continuously reviewed to ensure that it meets criteria of absolute **operational, managerial, and economic efficiency**, for which there is only one guiding principle: the best for the individual.

The latter must always be the primary reference point for every project or intervention, and products and solutions are developed starting from it.

This results in a rethinking of the role of sales agents and stores, which are increasingly conceived as global consultants and centers of excellence that offer personalised services.

The market changes, geopolitical scenarios evolve, needs change; what remains strong is Wimed's aspiration **to always do better, to be there for its stakeholders**, not only the end users of its products but also its collaborators, medical and healthcare personnel, suppliers, and the entire community it serves.

Our parent company Movi makes the route with its strict guidelines on ethics, transparency, and reference to the timeless values of solidarity, care, inclusion, and respect.

Based on these guidelines, **Wimed is enthusiastic about continuing to create value for the benefit of the community**. Our wish, addressed to all employees but also to external partners, is to continue on this path for another fifty years and beyond, always looking to the future, without setting limits.

Our hope is to do even better, every day, cultivating the desire to build our future.

Una storia di soluzioni per l'autonomia

HISTORY

Wimed was founded in 1976 as a business unit of Movi dedicated to the distribution of orthopedic and medical aids.

Over the years, Wimed gradually established itself as a leading player in the homecare market, until 1990, when it opened a dedicated sales network, supported by agents throughout the Country. This was an additional asset for establishing long-lasting relationships of trust with customers.

2005 marked another important milestone in the brand's history: the start of the design, development, and launch of Wimed-branded products, which marked its definitive entry into the market as a leading player able to start an independent path in the field of distribution. With a now well-established presence in Italy and in different Countries in Europe, Middle East and South America. Wimed is a solid company that is also successfully entering foreign markets.

Come and discover the world of Wimed!

ZERO PRESSURE

ANTI-DECUBITUS SYSTEM

The prevention of pressure sores is a priority in every care setting. Our anti-decubitus product line is designed to promote proper body support and help prevent pressure sores.

Mattresses, pillows, and other anti-decubitus aids meet a variety of needs, both at home and in professional settings. The materials and technologies used allow for more even weight distribution and better management of contact points.

Each solution is designed to offer practicality, durability, and ease of maintenance, contributing to the daily well-being of the individual and more effective care.

MATTRESS IN SILICONE COATED HOLLOW FIBRE WITH FIXED CELLS Made in Italy

Anti-decubitus aid suitable for use as an overlay on normal beds.

- Mattress consisting of 12 fixed cells
- Its ability to deform in response to stresses caused by patient movement reduces the risk of friction and shear forces.
- It ensures air permeability, preventing damage caused by prolonged capillary occlusion.

THERAPEUTIC WEIGHT CAPACITY	110 kg

POLYURETHANE ANTI-DECUBITUS MATTRESS UNI-CARE Made in Italy

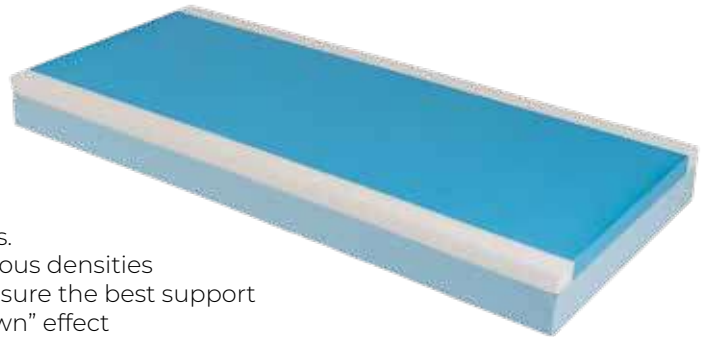

The 28EM mattress is a medical device intended for the prevention and/or adjunct treatment of pressure injuries.

- Product made of conventional micro-cellular, open-cell polyurethane foam, manufactured with pyramid-shaped pressure relief segments, without the use of C.F.C.
- It contains no latex and has been treated to prevent the growth of bacteria, microbes, mites and moulds
- Chemical protection against odours assured
- Perfect stability and adaptability of the mattress on the bed to any joint
- Excellent reduction of contact pressures and top comfort for the patient
- Suitable for patients at low risk of developing bedsores
- Available in two different sizes
- IIM fireproof, washable, zipped mattress cover available as an accessory (CODE 17/08 for 90 cm bed frame - CODE 17/08-120 for 120 cm bed frame)

CODE	DESCRIPTION	SIZE	THERAPEUTIC WEIGHT CAPACITY

POLYURETHANE ANTI-DECUBITUS MATTRESS PLURI-CARE

The PLURI-CARE mattress is a medical device intended for the prevention and/or adjunct treatment of pressure injuries.

- Made with micro-cellular open-cell polyurethane foam, of various densities
- The different materials and densities used for this mattress ensure the best support for users thanks to the stiffer base that avoids the “bottom down” effect
- Side stabilisers that facilitate getting in and out of bed and ensure the user is steady
- Excellent comfort and prevention of bedsores thanks to the memory foam upper insert that adapts to the user’s body
- It contains no latex and it has been treated to prevent the growth of bacteria, microbes, mites and moulds
- Chemical protection against odours assured
- Perfect stability and adaptability of the mattress on the bed at any joint; excellent reduction of contact pressures and top comfort for the patient
- Suitable for patients at low risk of developing bedsores
- IIM fireproof, washable, zipped mattress cover available as an accessory (CODE 17/08 for 90 cm bed frame)

EASY AIR II SYSTEM

Air-filled anti-decubitus system for home use, recommended for patients at low risk of developing pressure sores.

- Silent, reliable, easy to install and low maintenance
- Bubble height: 7 cm

CODE	DESCRIPTION	SIZE	THERAPEUTIC WEIGHT CAPACITY
94131010	EASY AIR II SYSTEM		
94130910	Air bubble mattress H 7 cm	200x90x7 cm	130 kg
94130845	Compressor		

EASY DOUBLE SYSTEM

12.5 cm high anti-decubitus system with compressor and pressure regulator, for home use, recommended for patients at low risk of pressure injuries or stage I injuries without unstable spinal fractures.

- Silent, reliable, easy to install and low maintenance
- Alternating mode operation: the two sets of honeycomb cells operate by alternately inflating and deflating in alternating cycles lasting a total of 6 minutes
- Adjustment of the inflation level of cells according to patient comfort

MID CURE and HIGH CURE

Anti-decubitus system for the prevention and treatment of patients at high risk of pressure ulcers: patients with up to stage III-IV lesions.

- The system consists of a digital compressor and an air-filled mattress with elastic straps for attachment to the bed
- The dual static/alternate function allows pressure peaks responsible for occlusion of the precapillary district to be released and prevents the onset of pressure lesions
- 20 min maximum pressure function to facilitate nursing operations on patients
- Cycle time adjustable from 12 to 24 min
- Continuous air flow under the cover ensures transpirability and prevents skin maceration
- Bi-elastic, waterproof, breathable and cover treated against micro-organisms
- Pocket for polyurethane base insertion (only for Mid Cure model)
- Also available in the 83x200x18 cm version with the addition of the polyurethane mattress code 94003850 (MR version)

CLINICAL CARE II e CLINICAL CARE II 120 CM

Pressure relief system for the prevention and treatment of patients at very high risk of pressure ulcers, or patients with stage IV pressure sores. The system consists of a digital compressor and a full-air replacement mattress equipped with elastic straps for bed fixation.

- The dual static/alternating function allows for the relief of pressure peaks responsible for pre-capillary occlusion, preventing the onset of pressure ulcers
- The continuous flow of air under the cover ensures breathability and prevents skin maceration
- Max pressure function to facilitate patient nursing maneuvers, with a 20-minute timer
- Adjustable alternating cycle time from 10 to 25 minutes
- The “Zero Pressure” feature enables total pressure relief in specific cells to protect open wounds or high-risk sites
- Bi-elastic, waterproof, breathable cover treated against micro-organisms
- Support base with seamless air circulation
- 3-way system

TRANSPORT	Keeps the mattress inflated	●	●	
ACOUSTIC AND VISUAL ALARMS	For malfunctions/low pressure	●	●	
CELL ON - CELL	Mattress consisting of a double layer of cells, in which the bottom row always remains inflated to protect the patient to avoid a hammock effect. The top cell can be removed to release pressure on a particular area	● HIGH CURE	●	
DOUBLE DIFFERENTIATION HEAD SELECTION	3 non-alternating semi-dynamic head cells in order to avoid vestibular stimuli	●	●	

GEL CUSHIONS

GEL TOP WITH HOLE

Seat cushion consisting of a layer of pressure-absorbing polyurethane gel and a layer of polyurethane foam.

- Highly breathable material and waterproof, rubberised underside with non-slip function to prevent sliding
- Gel and polyurethane foam ensure reduced contact pressures in order to distribute and increase the support surface area
- Outer lining made of waterproof, vapour-breathable, elastic and hypo-allergenic fabric

CODE	SIZE	THERAPEUTIC WEIGHT CAPACITY
PL1000/F	42x42x3 cm	120 kg

Product in distribution.

GEL TOP

Anti-decubitus gel cushion.

- Outer lining made of polyester/polyurethane with silver ions, impermeable to liquids and permeable to water vapour, antibacterial
- Bottom part of the cover made of non slip, removable fabric
- Lining machine washable up to 60°C

CODE	SIZE	THERAPEUTIC WEIGHT CAPACITY
PL300	40x40x4 cm	120 kg

Product in distribution.

ELECTRIC WHEELCHAIR

Compact power wheelchair designed for outdoor use.

This model is equipped with a suspension system engineered to handle uneven surfaces, rough terrain, paths, and obstacles. The unique frame technology ensures excellent stability while driving: Rocket 5 can safely descend barriers up to 14 cm high and provides a high level of comfort even on the most difficult terrain.

- Tension-adjustable backrest with cover
- Seat adjustable in both depth and width
- Standard viscoelastic cushion
- Electronic tilt system from 0° to 28°
- Manual backrest recline adjustment from 0° to 38°
- Removable armrests, height- and width-adjustable, with clothing guard side panels
- Depth-adjustable leg supports, swing-away, removable, inward-folding, with adjustable calf strap
- Footrests adjustable in flexion-extension and height; can be joined to form a single platform
- Standard pelvic belt and anti-tip wheels
- Option to move the joystick to the left armrest

MOBILITY & REHABILITATION

Independent mobility is an important part of well-being and quality of life.

Mobility and rehabilitation aids, such as rollators, walkers, lifts, etc., are essential tools for supporting daily mobility of users with disabilities.

This section provides an overview of Wimed solutions, highlighting technical specifications, features, and customization options, to help healthcare professionals and caregivers to select the most appropriate aid for each user.

TOILET AIDS

Wimed bathroom aids are solutions designed to support the independence of users with limited mobility during daily personal hygiene activities.

In this section, you'll find a selection of aids designed to meet a variety of needs: from toilet seats and risers, to bathtub and shower supports and grab bars, to shower chairs and commodes.

Each product is accompanied by precise technical information and instructions for proper use, so that healthcare professionals and users can make informed and safe choices.

SANITARY & LIVING AIDS

Wimed's medical devices for independent living are essential tools for helping users with mobility and posture and they contribute to the prevention of mobility-related complications.

This section presents a range of solutions, including orthopedic devices such as specialized shoes and footwear, neck pillows, and heel lifts, designed to improve posture, reduce stress, and contribute to daily well-being.

Each aid is described in full detail and accuracy to help users to select the product that best meets their needs.

Pillow with physiologically correct and optimal head and neck support with preventive action on cervical spine symptoms.

- Moulded support structure in Dryfeel®, innovative breathable cross-linked foam
- Dryfeel® benefits from the best air flow and ensures a high breathability of the pillow
- Treated with an antibacterial additive to keep it clean of bacteria and moulds, preventing unpleasant odors
- Excellent air permeability and breathability, improved moisture absorption
- Washable pillowcase in 100% cotton satin

PILLOWS

LATEX PILLOW

Soft and elastic 100% natural latex foam template with throughholes for constant ventilation.

- Excellent head and neck support
- Ventilation ensured by numerous micropores
- Quilted and padded cover pillowcase in knitted fabric with Tencel® yarn

CODE

33101301

Product in distribution.

SILENT ANTI-SNORE PILLOW

Pillow designed to lift the shoulders and head off the mattress surface, thus achieving a head flexion that facilitates forward sliding of the tongue, thus reducing the risk of snoring.

- Shaped internal structure made of flexible, non-deformable polyurethane foam
- The 3 button stitches on the cotton pillowcase unite the inner core and the padding
- Not recommended for persons suffering from diseases of the cervical region
- Not washable
